

THE STATEMENT OF THE POLITICS REGARDING THE QUALITY MANAGEMENT AND THE ENVIRONMENTAL MANAGEMENT

The maintenance of the Integrated Management System Quality-Environment and Health and Safety in working and to accomplish its running represents a priority in the managerial politics promoted in SC RODAX IMPEX SRL.

We want to realize an equilibrium between the quality of our services, the environmental protection and the protection of the life and the health of the people.

The vision of SC RODAX IMPEX SRL is to become an important provider on the market regarding the research activity, the manufacture of the medical devices, of the packaging equipments and of the accessories and elements of stainless steel for interior and exterior furniture by ensuring a superior quality and a quality of safety for the manufactured products.

The mission of SC RODAX IMPEX SRL is the manufacture of the products and the delivery of services in the area of research, of the mechanical procedures, of the service and of the technical assistance in the conditions of full safety for the people as well as for the environment, at the level of the legal requirements and of the regulations and of assuming of social liability, which will improve the safety in use for our beneficiary.

The values which we are sharing to realize our mission are: professionalism, sincerity and loyalty.

In the center of our activities are permanently:

- QUALITY of the products/services offered to our beneficiaries to increase the reliability of our clients and their satisfaction;
- PEOPLE who are entitled to a healthy life in an adequate working environment;
- ENVIRONMENT with its natural resources, which have to be respected, protected and capitalized in an efficient way.

To fulfill the requirements of our beneficiaries and to achieve the economic performances, we engage that the policy in the domain of the quality, of the environment, of the health and of the safety of work is the priority of the general politics of our company.

We realize this engagement consequential through:

- The tendency of our company to fulfill and when possible to exceed the requirements of our beneficiaries ;
- The permanent improvement of the Integrated Management System;
- The compliance with the legal requirements and with other requirements applicable to our company;
- The directing of our company to prevent the pollution of the environment through the development of the management of the natural resources and of the waste generated by the specific activities;
- Taking the measures and the pursuit of the favorable methods to minimize the noxious and the emissions and to diminish of the hazards of the accidents and of the illness;
- The directing of our company to ensure the most elevated standards regarding the safety of the products and the permanent improving of their safety in use;
- Maintaining under the control of the specific professional hazards;
- The mobilization of the people to achieve the objectives of the integrated management.

The responsibility to achieve and to improve permanently of the integrated system quality-environment-health and safety in working is of the all employees who in their activities will apply the principle ``prevention, not findings``, learning from the previous mistakes, to prevent the similar mistakes in the future.

In my quality of General Manager I engage myself to ensure the technical and organizational conditions, as well as the necessary resources to achieve the adopted policy in the domain of the quality, of the environment and of the safety in working.
